Good day from the Northeastern University College of Science,

I am writing to introduce our new Connected PhD program with a personal invitation to recommend students who would benefit from this innovative doctorate program. Our 2021 recruitment cycle is now open and we would love to see highly qualified students from National Yang Ming Chiao Tung University in our applicant pool.

In the Northeastern College of Science, we have reinvented the traditional PhD program, infusing elements of professional training, cross-disciplinary research, and work experience, to empower candidates with the full force of this top degree.

The program includes:

- a full tuition scholarship
- a graduate assistant position with stipend
- health insurance
- work experience opportunities

The Northeastern College of Science is committed to a culture of respect and action towards equity, and is a place where each person is valued and belongs. We are solving the greatest challenges of our planet with groundbreaking fundamental and applied research. Through the Connected PhD, our students receive top-rated research training that is work-aligned, empowering them to be confident, entrepreneurial problem-solvers with flexible skills.

Today's scientists are called upon to not only be experts in their discipline, but also skilled communicators, managers, leaders, policymakers and innovators. Connected PhD training includes a wealth of resources, support and mentorship, allowing students to fully realize their potential as scientific professionals, and preparing them for outstanding careers in academia or across the widest spectrum of industries, government or other careers.

Our online application is open until December 1<sup>st</sup>. However, we welcome inquiries at any time.

If you would like to learn more about our Connected PhD and how it may be an excellent fit for your students, do not hesitate to contact me or our Associate Dean for Professional Programs and Graduate Affairs, Dr. Jared Auclair.

Best regards,

Hazel Sive PhD  
Dean, College of Science
